

Webex Suite

Collaboration that drives business performance.

Power your business with innovative cloud technology that can provide your organization with all the tools for success – Anytime. Anywhere. Any Device.

When it comes to workplace productivity, the key word is 'frictionless.' Your employees need to be able to **work with speed, cohesion and ease.** With the **Cisco Webex Suite** you can provide your organization an end-to-end solution via a holistically integrated communications technology that make it easy for your employees to work productively.

Webex provides organizations with the ability to seamlessly and intuitively engage and collaborate with key decision makers, employees, suppliers, customers and others both inside and outside the organization thereby significantly **increasing organizational agility and productivity.**

With more businesses focusing on improving collaboration, easily used tools will ensure success.

But, with a diverse range of collaboration tools available, organizations are striving to find the right one. Making the right decision can be challenging when IT resources are already stretched.

Making the right decision is easy when you partner with experts

Collaboration is in Allstream's DNA. By partnering with us, you can decrease the burden on your IT staff, easily determine your actual requirements, determine the best configuration and ensure that your organization realizes the most benefits.

With **Flexworks™** – our proprietary project implementation process – we'll get your organization up and running quickly, without disruption or productivity impacting down-time.

Allstream collaboration experts are involved at every step of the way, supporting your organization's collaboration solution once activated and throughout its service life.

75%

rate **teamwork and collaboration** as "very important".*

72%

of executives rated **effective team communication** as the top aspect of collaboration that drives business success.**

The power of the Webex Suite, powered by Allstream HCS

Unlock the benefits for your business

Collaboration

Ease of Use

Team Building

Simplicity

Video Conferencing

Cloud

Webex Meetings

Cisco Webex Meetings offers **best in class video conferencing**, from small to huge (even up to 40,000+ attendees). With a comprehensive list of supported codecs, advanced noise-cancelling and HD Video, organizations will make a high-quality first impression a lasting one.

A smooth experience from start to finish, hosts can invite anyone with just a click of a link – no plug-ins or downloads are required to join. Other applications such as Office 365, Salesforce Office 365, Salesforce and Skype for Business easily interoperate with Webex meetings so users can join from any device they choose.

Can't make a meeting? Webex can send a recording of the session so the team always stays on the same page.

Webex Meetings

Integrations

Webex integrations provides **interconnection with 3rd Party applications** such as JIRA, SharePoint, Google Drive and more, so that Teams – become the hub for all project specific information. The integration of corporate directories, calendar (Outlook premise or cloud, G Suite) and other mission critical applications ensures a cohesive environment of shared information.

Increase your efficiency by having everything all in one platform, without ever needing to switch applications.

Webex Teams

Cisco Webex Teams (formally Cisco Spark) is the **collaborative tool that enables intuitive and always up-to-date communication across team members**, sharing files and documents anytime, anywhere, on any device, where all communications are protected within the secure and scalable platform.

Teams offers the most comprehensive communication tool Cisco has ever created. Share Files, Chat and Meet with team members via group messaging, set-up custom notifications to get alerts about messages that matter and flag them for follow up. All team specific files and conversations are saved in a dedicated virtual meeting space so you'll never miss or lose track of any crucial details.

You can schedule and start a meeting from Teams with a single click. Seamlessly switch devices as well with automatic pairing with Cisco video devices and mobile phones

Webex Teams

Flexible voice

Make voice calls without complexity. **Webex Calling** enables organizations the ability to leverage Webex Teams to handle all calling needs.

As an **innovator in SIP technology**, Allstream is positioned to deliver high-performance business-class voice. Allstream also leverages existing network infrastructure to ensure the best performance possible.

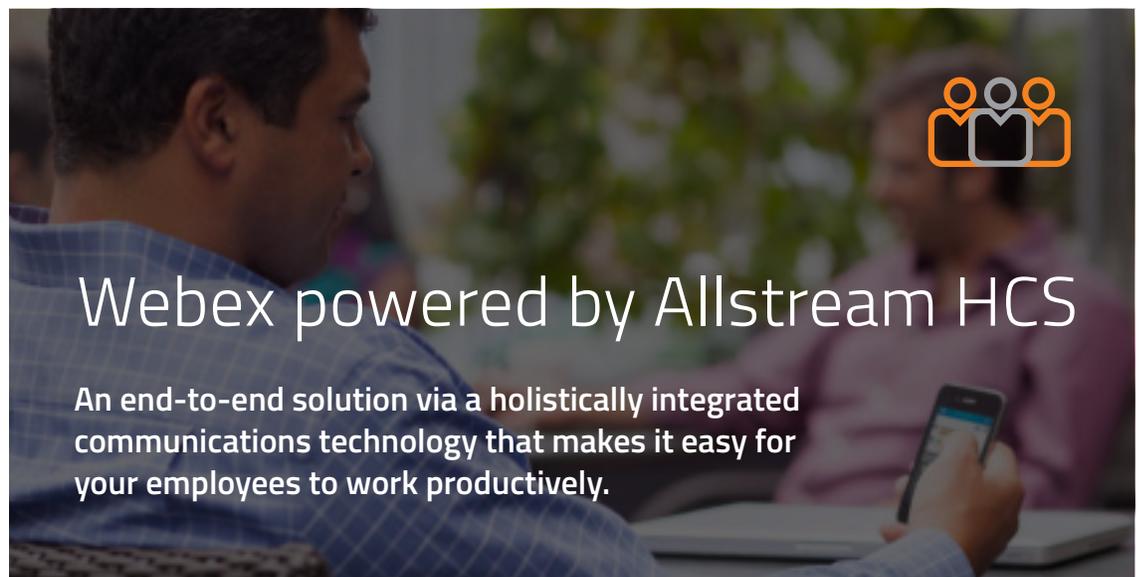

Reliable security

Rest easy knowing that your information is protected through **Enterprise-class end-to-end encryption** for all your messages, along with secure search, and advanced user management.

Allstream's business network experts will ensure that your implementation covers all the security bases for your organization. Allstream is trusted by governments and enterprises that have the most stringent security requirements.
